EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Carl Reed (Reg. No. 45454) on 5/22/2009.

Art Unit: 2442

IN THE CLAIMS:

In claim 15 at line 19, after "cable" and prior to ",", wherein the routing node"

insert the text:

"without disrupting a flow of the network data in the network cable"

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

Applicant's claimed subject matter is directed to network taps. The prior art does teach network taps in general, as well as where network taps are involved in inserting data; however, the prior art does not teach or suggest the subject matter of claims 1, claim 15 as currently amended, and claim 26, including a network tap including means for inserting device data from attached network devices without disrupting the flow of network data, wherein the means for inserting coordinates transmission of the device data and the network data to avoid collisions.

Applicant's arguments, particularly pages 14 - 16, have argued this point persuasively.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
